

Environmental Policy

A&A is committed to managing environmental matters in a responsible manner. All tasks will be carried out in line with the current environmental legislation, regulations, and licenses. Our commitment includes our surrounding environment and our day-to-day operations.

We strive for continual review of our processes to ensure that our environmental impacts are reduced to minimal levels, and we will achieve this by:

- ▶ **Working towards improving our environmental performance by establishing and assessing our environmental goals and targets and keeping track of our progress.**
- ▶ **We will provide our staff with training on environmental issues to raise their awareness and ensure compliance with our policies.**
- ▶ **Our primary objective is to prevent pollution by minimizing the release of harmful substances into the environment and conserving natural resources by using raw materials efficiently.**
- ▶ **We will communicate our dedication to environmental responsibility with all of our stakeholders, including employees, contractors, suppliers, and customers.**

Management at all levels of the company are responsible for ensuring that this policy is communicated and adhered to by all employees and that it is made available to interested members of the public.

ENVIRONMENTAL GUIDELINES

- ▶ The wastewater generated from cleaning operations must be disposed of in a sewage system.
- ▶ It is essential to take all necessary measures to prevent the waste from entering storm drains or groundwater.
- ▶ In the event of any chemical spills, they must be contained to the best of our abilities and promptly reported to the manager.
- ▶ Whenever feasible, waste materials should be recycled to reduce the environmental impact.
- ▶ All containers, dispensers, and other items used to store or dispense chemicals must be collected and recycled.
- ▶ To conserve energy, make sure to turn off all electrical items such as lights and air conditioning after completing tasks.

ENVIRONMENTAL INITIATIVES

- ▶ Where feasible, microfiber technology will be utilized to eliminate the need for chemicals.
- ▶ Recycled paper products and bin liners will be used exclusively unless otherwise directed.
- ▶ All new staff members will receive environmental responsibility training during their initial induction.
- ▶ We will collaborate closely with waste and recycling contractors to achieve our reduction objectives.
- ▶ We will adopt new technologies in equipment to reduce chemical and water consumption.
- ▶ Environmental impact assessments will be conducted at all sites.
- ▶ A chemical spill clean-up guide will be placed in cleaner rooms for easy access.
- ▶ Sustainable SDS documentation will be available for all locations.
- ▶ We will engage with suppliers to explore the use of more eco-friendly products.
